

STOP THE INVASION- REPORT THIS PEST

Coqui Frog

Maui County Priority Pest for Maui, Lanai, and Molokai:

Coqui frog (*Eleutherodactylus coqui*) is a small tree frog that is known for its loud "ko-kee" call. Found on ground level and in trees and bushes, but calls primarily from 1-2m (3-7 feet). Can live in wet and dry conditions.

Identification

Length- 2.5 cm (1 in) long

Coloration- variable from light yellow to dark brown

Vocalization- distinctive "ko-kee" sound

Look for: Broad rounded snout with obvious toe pads

The coqui frog displays variable coloration in Hawaii.

Don't Mistake the coqui frog for these look-alikes:

Greenhouse frog

Greenhouse frog (*Eleutherodactylus planirostris*):

The greenhouse frog is more widespread in Maui County than the coqui. This small tree frog is usually slightly smaller than 2.5 cm (1 in). Usually copper colored with WARTY TEXTURED SKIN. Narrower snout and less distinct toepads than the coqui frog. CRICKET-LIKE VOCALIZATION. Found only on the ground.

Greenhouse frog (*Eleutherodactylus planirostris*) has a narrower snout and less pronounced toe pads than the coqui frog. Image courtesy A. Hara, UH CTAHR.
